California Public Utilities Commission
505 Van Ness Avenue, Hearing Room A
(Corner of Van Ness Avenue and McAllister Street)

The Telecommunications Division is hosting a workshop to discuss the Proposed Rules for Carriers' Short Term Inventory Levels addressed in the "Assigned Commissioner's Ruling Implementing Carrier Inventory Rules and Workshop" dated September 24, 2004.

Carriers' and other parties' technical experts should come prepared to discuss such issues as: how inventory rules based on historical use will affect carrier supply needs; whether another basis should be used for setting inventory rules; which numbering categories should be used to define historical use; how many NRUF periods should be considered in defining rules, and whether - and, if so, how - growth rate should be incorporated into inventory rules. Parties should also discuss the role marketing strategy should play in projecting six-month inventory rules. Carriers should be prepared to factually support their positions on historical use as well as future projections, especially as to marketing projections. Parties should provide any additional information they deem to be relevant in the shaping of any future inventory rules. In general, parties should provide supporting data to demonstrate their positions and arguments concerning need for numbers. Parties who wish to present alternate proposals for inventory rules should submit them in advance via email to Cherrie Conner (chr@cpuc.ca.gov) no later than Wednesday, September 29, 2004 at 5pm. Parties making presentations should plan to take no more than ten minutes to present their proposal, and they should come prepared to substantively support their proposal.

Summary: On September 20, 2004, Richard B. Severy, Director of State Regulatory-West, MCI, Inc. (MCI), had a telephone conversation with Robert Wullenjohn, advisor to Cmmr. Brown. Peter Casciato, representing Time Warner Telecom of California, L.P., also participated. In advance of the meeting, Severy forwarded to Robert Wullenjohn via email a copy of a recent decision (copy attached), Qwest Corporation v. Scott, issued by the United States Court of Appeals, Eighth District, on August 23, 2004. Severy reported that the federal appellate court had determined that a state public utility commission had the authority, and was not preempted from requiring an incumbent local exchange carrier (ILEC) to provide performance reports for its special access services, including those purchased out of the ILEC's interstate tariffs. Casciato and Severy explained that competitors are, and will be, increasingly more reliant on special access services provided by ILECs and that they have a strong interest in ensuring that services are reliable and of high quality. Casciato and Severy urged the Commission that, when it adopts performance measures and reporting requirements for SBC's special access services, that they cover special access services that are purchased by California customers out of SBC's interstate and intrastate tariffs.

Summary: On September 20, 2004, Richard B. Severy, Director of State Regulatory-West, MCI, Inc. (MCI), met with Cmmr. Kennedy in San Francisco. Also present was William C. Harrelson, Senior Counsel of MCI. MCI representatives applauded the Judge and Telecommunications Division staff work on the revised proposed decision noting that it best reflects among the alternative decisions before the Commission TELRIC and the trend of declining loop costs since the vintage of the costs used to set prices in OANAD. Harrelson explained why California loop costs should be among the very lowest in the nation and questioned what good public policy would be furthered by unjustifiably increasing UNE prices and, inevitably, retail rates for local services for all consumers.

Summary: On September 20, 2004, Regina Costa, Telecommunications Research Director of The Utility

Reform Network, met with Cmmr. Kennedy in San Francisco. Also present were Tim Sullivan, advisor to Cmmr. Kennedy, Robert Wullenjohn, advisor to Cmmr. Brown, ALJ Duda and other attendees listed on the attachment to the notice. Costa explained that under the Commission's imputation rules, higher prices for UNEs could well result in higher prices for retail services and an increase in the end user surcharges for both the ULTS fund and California High Cost fund B. Costa explained that UNE prices are an integral part of the Commission's imputation formula. Costa also noted that because loop costs are the primary cost driver for the California High Cost Fund B, the adopted loop prices will affect the size of the fund and, consequently, the surcharge on customer bills that generates revenue for the fund.

Summary: On September 20, 2004, Natalie Billingsley of the Office of Ratepayer Advocates attended an all-party meeting with Cmmr. Kennedy in San Francisco. Also present were Tim Sullivan and Karl Bemederfer, advisors to Cmmr. Kennedy, Robert Wullenjohn, advisor to Cmmr. Brown, advisor Robert Lane, ALJ Duda and other attendees listed on the attachment to the notice. Billingsley pointed out that SBC CA's claims that the current and proposed UNE rates were all below SBC CA's cost of providing the UNE are disingenuous because SBC CA receives hundreds of millions of dollars annually in external subsidy funding from the California high Cost Fund B, and that those subsidies are not generally available to competitive local exchange carriers. Billingsley stated that the Commission has to follow TELRIC in setting UNE rates.

Summary: On September 21, 2004, Richard B. Severy, Director of State Regulatory, MCI, Inc. (MCI), met with Lester Wong, advisor to Pres. Peevey, in San Francisco. Also present was William C. Harrelson, Senior Counsel of MCI. Written materials (attached to the notice) were used. MCI representatives explained that the revised proposed decision (RPD) reflects declining loop costs better than prior recommended decisions but still requires some modifications to ensure that the finally adopted rates are TELRIC compliant. The MCI representatives explained that there is no rational justification for increasing loop prices. MCI explained that the revised alternate of Cmmr. Wood arbitrarily increases the already too high loop prices recommended in the RPD and the Cmmr. Kennedy's and Cmmr. Peevey's alternates only make matter worse. Severy summarized why California's loop costs should be among the very lowest in the country. Harrelson noted the capital structure assumed was the only difference in the Cmmr. Peevey alternate and Cmmr. Kennedy alternate, but that both were wrong in giving increased weighting to market versus book capital structure. Harrelson explained that the RPD got it right by relying on a 50/50 weighting which basically mirrored SBC's target capital structure. Harrelson explained why other factors increasing prices in all the alternates were unwarranted. Finally, MCI explained why LoopCat could not be relied on to set UNE prices.
